RE: 40 CFR Part 60, NSPS Subpart OOOOa Notifications
Bargath LLC – Parachute Creek Gas Plant
Permit No.: 02GA0014 – Issuance 1

To Whom It May Concern:

Bargath LLC (Williams) is submitting this notification as required by 40 CFR §60.5420a(a)(1) of the New Source Performance Standards (NSPS) Subpart OOOOa for the Parachute Creek Gas Plant in Garfield County, CO.

Nature of Change: Installation of mixed liquids (condensate & produced water) storage tank emissions control device. There are currently four (4) liquids storage tanks used to store plant liquids each with a capacity of 400 barrels (bbls). The tank vents are manifolded together to a common vent stack. Working and breathing emissions are vented to atmosphere through this common vent stack.

Present and proposed emissions controls: Presently, the emissions from these tanks are not controlled and go to atmosphere. The project change will install an enclosed combustor and route emissions from these tanks to the combustor to reduce emissions emitted to atmosphere. There is no change to the productive capacity of the facility as a result of the addition.

Commencement of Construction Date: Anticipated commencement of construction estimated to occur between November 30, 2020 and March 1, 2021.

We are currently in the process of evaluating if this project will trigger OOOOa for the condensate system process unit.

If you have any questions or require additional information, please contact me at (970) 285-5457 or by email at virginia.phillips@williams.com.

Sincerely,
Bargath LLC
